NIMBOSTRATUS

PEDAGOGIK.BE

A photograph of stratocumulus clouds, which are low-level, greyish clouds with a lumpy, bumpy appearance. They cover most of the sky, with some blue sky visible between the cloud patches.

STRATOCUMULUS

PEDAGOGIK.BE

A photograph of alto cumulus clouds, which are mid-level, white, rounded clouds. They are scattered across a bright blue sky. The tops of several green pine trees are visible at the bottom of the frame.

ALTOCUMULUS

PEDAGOGIK.BE

A photograph of cirrostratus clouds, which are high-level, thin, and wispy clouds. They appear as delicate, horizontal streaks across a clear blue sky.

CIRROSTRATUS

PEDAGOGIK.BE

A photograph of cirrocumulus clouds, which are high-level, white, and appear as a dense layer of small, rounded cloudlets. The sky is a deep blue, and the clouds are illuminated from below, giving them a golden glow.
